

# AutoCount Express

Everyone can do accounting

More Than  
**25,000**  
companies

Without any accounting knowledge, you can start using AutoCount Express to manage your daily business data immediately. You will appreciate its familiar and easy-to-navigate Windows interface. Most of the features and functions in AutoCount Express are fully keyboard operable. Finally, it is offered at an affordable price.

## Why you should choose AutoCount Express?

### No Double Entry

AutoCount Express has 13 well designed source document entries for different types of transactions. Now, you can start entering data and generate reports instantly even without any accounting debit and credit knowledge.

### Saves Time And Improve Work Efficiency

In AutoCount Express, each module is integrated and operated seamlessly under one system. It has been optimized to use fewest steps to create and edit transactions. Hence, it minimizes your workload and reduces human error.

### Microsoft SQL Server

AutoCount Express sits on top of Microsoft SQL Server which provides greater reliability and higher performance. Most of the functions have been optimized for the fastest speed. Using ADO.NET, AutoCount Express provides greater performance and scalability than traditional client server application.

### No Re-index Required

Supported by powerful Microsoft SQL server, you will never have to re-index on your database when there is power failure or improper program shut down.

### GST Ready

AutoCount Express is fully GST compliant. Hence, it prepares your business for Goods and Services Tax which will be implemented in Malaysia anytime soon.

### Real Time Posting

AutoCount Express integrates accounting, stock and invoicing into a single system. Once transaction is saved, it will post to GL accounts and update reports instantly. For example, when you saved your sales invoice, it will update your account and stock reports instantly.

### No Year End Closing

In AutoCount Express, it is optional for users to do year-end closing after certain accounting period to continue transaction for the next period. Instead, you can keep multi-years of data in a single account book.

### Search Data Instantly

AutoCount Express has strong search capability to help you find past transactions easily. With its built-in powerful search engine, you can search any transactions or documents from different angles and different criteria.

### Drill Down From Reports

AutoCount Express drill-down feature allows you to drill down to source documents from reports and chart of accounts. It makes finding and editing data easily.

### No Insurance Cover Plan

And the best thing is you never have to pay software insurance to enjoy software updates and version upgrades.
